

**Title: Drugs may be required...therapeutic and non-therapeutic interventions in CL care and wear**

**Author: Keyur Patel**

**Affiliation: Tompkins Knight & Son Optometrists**

**Abstract:**

Contact Lenses and their wearers both require care and maintenance. Is the lens the problem or is it the patient?

In this session Keyur will be sharing common presentations of contact lens related problems and management strategies for the lens and the wearer, from simple solution changes to prescription tablets. A 20minute whistle stop tour. Drugs may be required.
