

Langis Michaud

Dr Langis Michaud graduated from École d'optométrie de l'Université de Montréal in 1986 where he also obtained his Master's Degree in physiological optics (1998). He also received a diploma in Public Administration from École Nationale d'Administration Publique (ENAP) in 2006. He is a full professor and practices at Université de Montréal since 2001, as the chief of the contact lens department and served as a Dean of the School (2020-22).

He is Fellow of the American Academy of Optometry (Diplomate), the British Contact Lens Association, the Scleral Lens Education Society and of the European Academy of Optometry.

Dr Michaud's main research interests are myopia control, scleral contact lenses, keratoneuralgia and anterior segment irregularities like keratoconus. He is also interested in ocular manifestations of Fabry disease. He has published numerous articles in peer-reviewed journals and publications or professional reviews. He is an author of many book chapters and more recently co-author of the only book pertaining to myopia management. Because of his expertise he is a regular speaker at major optometry and ophthalmology meetings around the world.
