

Title: Modern Innovations in Scleral Lens Application and Removal

Author: Mile Bruic

Abstract:

Successful scleral lens wear depends on both proper fitting characteristics and consistent patient compliance with lens application, removal, and care. As new technologies emerge, eye care practitioners must remain open to adopting tools that improve patient success and simplify the lens handling process. This discussion will review an advancement in contact lens application and removal that utilizes a multifunctional tool designed to enhance ease of use, improve patient confidence, and support long-term success with scleral lens wear.
