

Sonia Ortiz Peregrina

Sonia Ortiz Peregrina is an Associate Professor at the University of Granada (Spain). She holds a degree in Optics and Optometry, a master's degree in Advanced Optics and Optometry, and a PhD in Physics and Space Sciences. She has been teaching contact lens fitting at the University of Granada since 2016. Among other topics, her current research focuses on the ocular surface, specifically the search for biomarkers for dry eye disease and the development of new, more objective methodologies for contact lens fitting. She has authored 36 peer-reviewed articles in scientific journals and has participated in several research projects.
